Photoshop EXpress [Win/Mac]

The following are some handy Photoshop tips and tricks for beginners. Set the Color Mode to Grayscale You will use the color range more than the grayscale range, but it's still a good idea to set your images to grayscale if you want to bring out more contrast and details. The Image Size dialog box is where you'll change the color mode and other adjustments. You can change the color mode to Grayscale by clicking the Image Size dialog box launcher icon and choosing Grayscale from the Color Mode drop-down menu. Choose a Wide Angle Lens If you're new to photography, you may not realize that most digital cameras have autofocus and focus, as well as the ability to take multiple images. If you want to truly master Photoshop, however, you should be able to take all the images you want and then later combine them to get the exact results you want. If you're shooting with a wide-angle lens, you may end up with an image that doesn't quite fill the frame. The first step to fixing that is to get a lens that really does fill the frame, at least when taking wide-angle photos. This means you need to go with at least a 16mm lens. If your camera has a zoom, you can skip this step. Use the Anamorphic Tool to Correct Distortion Adobe Photoshop allows you to correct a distorted photo by using a special tool called the Anamorphic tool. To get the best effects, you must apply the correct amount of tool to the photo. To get the best effects, you must apply the correct amount of tool to the photo. Choose the Correct radial distortion tool from the Anamorphic/Astigmatism tool group (see Figure 17-1). You can see the tool here by the partially obscured toolbox icon. To resize the tool, click and hold on the text box that says Radius. You can then drag the box to resize the tool. Photoshop for Mac offers a slightly different tool: the Anamorphic lens. You can see the tool on the left side of Figure 17-1. Photoshop for Windows offers a similar tool, although it's not as easy to resize as the Mac version. You can resize the tool by simply clicking and dragging the bounding box on the text box. If you need to correct chromatic aberration, use the Radial distortion tool and then transform the image

WJC25: Toss-up tale of three teams Sydney hosts the WJC on September 29-October 2 – take a look at the Who Are You? panel. During the Who Are You? panel at last year's WJC I went home determined to get my holiday out of the way in 2013 so that I could comfortably soak up the wealth of sporting, community and academic events the winter takes in. It's not an easy task when you love to over analyse sport and events but with an important WJC tournament coming up the autumn, I may be doing the same again this time around. Sydney co-hosts the tournament in 2013 The World Junior Championships are the largest international junior championship in sport. The event starts with a two-day competition in four age categories – 16s, under 18s, under 20s and under 22s – with the two better-placed teams after day one in each category going through to semi-finals. This year the competition takes place at the world-famous new Sydney Olympic Park Aquatic Centre and track. Sydney Olympic Park Aquatic Centre It's four and a half hours of competition on the first day of the tournament and if I have anything to do with it, it will be a tough slog with the best of the best in the world for Gold and Silver Medal events. Aussie Rules Football On the 2nd day of the tournament we will be playing rugby and catching the Aussie Rules Football match between the under 18s and the under 20s. I have followed the Aussie Rules World Cup tournament closely over the last 12 months and have had the privilege to meet the players of the Australian Capital Territory-based Aussie Rules squad. A couple of times I have also witnessed the players being interviewed after a big performance or while they are speaking to the media. I have developed a few crushes over the last six months and, to be honest, the sporting thing is only part of my reason for following Aussie Rules. It is the sense of camaraderie, the similarity of the sport to the physical nature of our great game of soccer and the amount of sweat that is shed that gives Aussie Rules real appeal to me. Soccer – Aussie Rules' first love If you're wondering why I am so happy when an Aussie Rules game is played, you might not be far wrong in assuming

While it's always fun to hear from the folks at PAX, it's especially meaningful when you actually see their games in action. Check out this quick look at Rock of Ages 2! We've been lucky in our office lately. We've been able to play a few games from PAX already, including an Xbox launch title demo during our interview with EA's president of CFO Peter Moore. We were able to play a bit of Rock of Ages 2, the sequel to the classic iPhone game from Mayday Games. It was a massive hit in the press demos, and now we're finally able to tell you guys what it's like. It's a lot of fun. For those who played the original Rock of Ages, you'll remember the game was basically Tetris meets Minecraft. You'd set yourself a solid course, smashing the blocks and slinging the blocks at enemies to knock them off course. You could even build to your own designs by building an arch to shoot into the air and then pull yourself up to flip a switch on your arch and line you up with enemies below. It was a really unique and fun game, although it played in a sort of endless mode, so eventually you'd run out of blocks to add and you'd be left with one slide to attempt another course. Rock of Ages 2 is a different kind of game. As you can see in this new preview, the gameplay is a lot more about running and gunning. You're running, slinging blocks, then running up ramps to evade enemies. The action is a little faster and the game is more about dodging everything than piling on the blocks. The game is much more open world, and the environment is much larger than the original. You now spend most of your time running through towns and shooting various gangsters. Some of the levels have specific goals, like saving some characters from people trying to murder them. You use the same style of blocks that you use in the single player, so you'll have your classic finishing moves to aid you in your ventures. There's also more special blocks to collect, such as a rainbow block that grants you a super rainbow block that shoots multiple rainbow blocks into the air. The great thing about Rock of Ages 2 is that it feels like a game that came out just yesterday, but one that's been building up
